Bass Highway - Wynyard to Marrawah

2021-22 Projects

In February 2020, the Department of State Growth released the **Bass Highway - Wynyard to Marrawah Corridor Strategy**.

The Strategy is an evidence-based plan to address current and future transport needs, with a prioritised list of improvement projects for the next 20 years. The strategy was developed in consultation with stakeholders and the community. It incorporated a review of current and future road demand, and the highway's current performance.

Proposed projects include new overtaking lanes, junction upgrades and safety improvements, to make the road safer and increase productivity.

Nine projects to be delivered under this program will be delivered in the 2020-21 construction season.

For more information on these projects, please visit the Transport website, contact GHD on (03) 6210 0662 or email participate@ghd.com.
