

Changes to the Huon Valley timetable

We are listening to the community's feedback about changes to bus services and are putting in place some changes from Sunday 18 August

Extra peak weekday services between Hobart and Huonville

In the morning, there will be an additional route 710 service to Hobart departing Huonville at 8:48am. In the afternoon, there will be an extra route 710 service to Huonville departing Hobart at 4:39pm.

Increased counter peak services to Huonville

In the morning, there will be a route 719 service departing Hobart at 7:36am, and a 710 service departing Hobart at 7:56am - that's an extra service before 8:20am - previously there was only one departure at 7:45am.

In the afternoon, there will be two services departing Huonville after 5pm. One at 5:10pm and another at 5:45pm - previously there was only one service at 5:40pm.

Weekend and public holiday timings adjusted

The 718 service to Geeveston and Dover will now depart Hobart at 4:30pm.

The 714 service to Cygnet will now depart Hobart at 5:45pm. This change has been made following requests from the Cygnet community for a later weekend service and means the last service to Huonville will now depart 30 minutes later than on the previous timetable.

There will be a new mid-afternoon 716 service to Geeveston which will depart Hobart at 3:15pm. This service will then head back to Hobart, departing Geeveston at 4:27pm, passing through Huonville at 4:52pm and arriving at Hobart at 5:37pm - creating a new late service from Geeveston and a later last service of the day from Huonville.

The last service leaving Hobart for Huonville, the 714, is also going to depart 30 minutes later at 5:45pm.

Better connections and adjusted timings

Because we are constantly looking for areas to improve the network we have slightly adjusted some service timings to support better connections with other services at Kingston Central, and so what's shown on the timetable better reflects actual travel times – meaning less delays and less waiting at timing points.
