

Vehicle Inspection Services

The Department of State Growth (the Department) entered into a Registration of Interest process in 2015 aimed at identifying suitable businesses that wished to provide heavy, public passenger vehicle and type approval vehicle inspection services under contract.

At the completion of this process, businesses that met all Departmental requirements were awarded contracts. All contracts are due to expire in August 2020.

This process was in line with contractor procurement policy directions under the Financial Management and Audit Act 1990.

The Department will undertake a review of the scheme before the conclusion of this initial contract period.

The purpose of this review will be to determine if a further Registration of Interest process is required to allow additional businesses to be awarded contracts to meet service level demands or determine if the Department should extend the contracts for a further 3 year period as allowed for in the terms of the current contracts.

The Department will also consider entering into a further Registration of Interest process if the number of AIS Contractors in key areas result in a negative impact on service delivery levels.

If it is determined necessary to enter into a further Registration of Interest processes the Department will post all relevant information on this Website and advertise in all major Tasmanian Newspapers.
