

Mapping Comparison

Guide to Temporary Traffic Management and Australian Standard 1742.3 (2009)

The Department of State Growth would like to inform you of an update from Austroads.

Austroads have released a new document:

[Mapping Comparison – Guide to Temporary Traffic Management and Australian Standard 1742.3 \(2009\).](#)

This document maps the content from the superseded AS1742.3 (2009) to either the revised standard AS1742.3 (2019) or Austroads Guide to Temporary Traffic Management (AGTTM).

Background:

AS1742.3 (2009) was updated by Standards Australia in December 2019, along with the release of the AGTTM.

This update included the removal of content from the 2009 Standard that was typically defined as guidance material. This guidance material has been substantially transferred into the Austroads Guide to Temporary Traffic Management and expanded based on information from Austroads member organisations.

This document is designed to help stakeholders understand the updates and changes to the content from AS1742.3 (2009) and how to identify the new location of certain content in either AS1742.3 (2019) or the Guide to Temporary Traffic Management.
